Duke Forest Teaching & Research Lab

Project 1- Design factsheets for education and outreach events (possible topics: mussels, macroinvertebrates, geomorphology) that can be used with a range of age groups.

Project 2- Develop/pilot docent role for the Shepherd Nature Trail (SNT). This could include the organization of a comprehensive SNT content handbook, training on and leading a public tour, and/or developing a training plan for future docent program.

Project 3- Support and expand the Carolina Butterfly Monitoring Program in the Duke Forest with Jeff Pippen. Adopt existing butterfly survey routes that aren't currently being monitored. (See flyer below)

Project 4- Support herpetofauna education and outreach events. Develop herp related activity for K-5 class field trips and/or help host Duke undergraduates in herpetofauna monitoring as part of orientation programming.
